

[AngularJS Add,Edit,Update,Delete using Bootstrap modal with DataTable in PHP](#)

Hi Guys, Today we are going to see How to use AngularJS Add, Edit, Update, Delete using Bootstrap modal with DataTable in PHP. AngularJS is a very powerful JavaScript Framework. It is used in Single Page Application projects. By using this application without refresh the page you can get server-side response. In this tutorial, I have created a simple way to learn angular js curd operation. Follow the below simple setup process.

[Mysql Stored Procedure And Get Procedure Data From PHP](#)
